

AutoFetchStep::execute

DataManagementStep
::execute

SimulationStep::execute

LauncherUI::print_progress

```
graph LR; A[AutoFetchStep::execute] --> D[LauncherUI::print_progress]; B[DataManagementStep::execute] --> D; C[SimulationStep::execute] --> D;
```

The diagram illustrates three separate execution steps on the left, each represented by a white box with a black border. These steps are 'AutoFetchStep::execute', 'DataManagementStep::execute', and 'SimulationStep::execute'. Blue arrows originate from the right side of each of these boxes and point towards a single, gray-shaded box on the right labeled 'LauncherUI::print_progress'. This visualizes a common output or action triggered by multiple different processes.
