

SimulationStep::execute

SolarSystemAPI::handle
_simulate

SolarSystem::Core::
Builders::SimulationBuilder
::with_bodies

```
graph LR; A[SimulationStep::execute] --> C[SolarSystem::Core::Builders::SimulationBuilder::with_bodies]; B[SolarSystemAPI::handle_simulate] --> C;
```

The diagram illustrates a mapping from two external functions to a single internal component. On the left, two white rectangular boxes with black borders contain the text 'SimulationStep::execute' and 'SolarSystemAPI::handle_simulate'. On the right, a gray rectangular box with a black border contains the text 'SolarSystem::Core::Builders::SimulationBuilder::with_bodies'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both external functions delegate or call the internal 'with_bodies' method.
