

demonstrate_ci_integration

```
graph LR; A[demonstrate_ci_integration] --> B["SolarSystem::Testing<br>::CIIntegration::generate<br>_github_actions_output"]; A --> C["SolarSystem::Testing<br>::CIIntegration::generate<br>_performance_badge"];
```

The diagram illustrates a function call 'demonstrate_ci_integration' which branches into two separate sub-calls. The first sub-call is 'SolarSystem::Testing::CIIntegration::generate_github_actions_output' and the second is 'SolarSystem::Testing::CIIntegration::generate_performance_badge'. Both sub-calls are contained within boxes that have a black border and a light gray background.

SolarSystem::Testing
::CIIntegration::generate
_github_actions_output

SolarSystem::Testing
::CIIntegration::generate
_performance_badge
