

SolarSystem::Utils
::SimulationConfig::
get_target_date

```
graph LR; A["SolarSystem::Utils  
::SimulationConfig::  
get_target_date"] --> B["SolarSystem::Utils  
::Date::now"]; B --> C["SolarSystem::Utils  
::Date::Date"];
```

The diagram illustrates a sequence of three function calls. The first call, shown in a grey box, is `SolarSystem::Utils::SimulationConfig::get_target_date`. This call leads to a second call, `SolarSystem::Utils::Date::now`, shown in a white box. The second call then leads to a third call, `SolarSystem::Utils::Date::Date`, also shown in a white box. Blue arrows indicate the flow from left to right between the boxes.

SolarSystem::Utils
